PROFILE SUMMARY

I'm a fresher full-stack developer skilled in the MERN stack—MongoDB, Express.js, React.js, and Node.js—with a strong foundation in front-end technologies like HTML, CSS, and JavaScript. Although I come from a geospatial background with 3 years of experience as a LiDAR Analyst, I'm now focused on building a career in web development. I enjoy solving real-world problems through code and am actively seeking a full-stack role where I can contribute to impactful projects and grow as a developer.

PROJECTS

Country Card App

Technologies -React.js, REST API

Front End web Application app has been build using React.js ,Rest API , HTML, CSS and JavaScript

Favourite Student App

Technologies -React .js

Responsive Favourite student app build using React.js, styled with TailwindCSS and deployed on the Vercel platform.
